Algorithms and Programming II

QUIZ

1) Find the errors, correct them, fill the missing lines of the given code and write the outputs

```
#include <stdio.h>
#include <stdlib.h>
int * fun (int n)
{
    static int array [5];
    int * p, i;

    *p = 100;

    for ( i = 0; i < 5; i++)
    {
        array[i] = (i+1)*n;
    }

    .....
}

int main (void)
{
    int **k;
    int i;
    .....
    for (i = 0; i < 3; i++)
    {
        .....

        k[i] = fun(i);
    }

    for ( i = 0; i < 3; i++)
    {
        printf("%d ",*k[i]);
    }
    printf("\n");

    return 0;
}
```

```
#include <stdio.h>
#include <stdlib.h>
int * fun (int n)
{
    static int array [5];
    int * p, i;

    /**p = 100; //ERROR

    for ( i = 0; i < 5; i++)
    {
        array[i] = (i+1)*n;
    }

    return array;
}

int main (void)
{
    int **k;
    int i;
    k = (int **) calloc(3,sizeof(int));
    for (i = 0; i < 3; i++)
    {
        k[i] = (int *) calloc(5,sizeof(int));
        k[i] = fun(i);
    }
    for ( i = 0; i < 3; i++)
    {
        printf("%d ",*k[i]);
    }
    printf("\n");
    return 0;
}

OUTPUTS: 2 2 2
```
