

CEN 301

Data Management and File Structures

Selma Ayşe ÖZEL

Department of Computer Engineering
Çukurova University

CEN 301

Instructor: Selma Ayşe ÖZEL

Email: saozel@cu.edu.tr

Lecture Hours:

- Day time group: Mon. 13:15 – 16:00 (R2 309)
- Evening group: Mon. 17:15 – 20:00 (R2 308)

Lecture Notes:

- You can download lecture notes from the ÇÜBİS.

Homework Submission:

- You will submit your homework by sending it with e-mail to dataorg2017@gmail.com or
- To me during class hours

Course Description

Course Objectives:

- To learn physical structure of the secondary storage devices, so that efficiently retrieve the large amount of data from these devices.
- To be able to work with the large amount of data stored in the secondary storage devices.
- To be able to make abstraction of real life data using entity relationship model to develop solutions in computer environment.

Text Book and References:

1. R.Ramakrishnan, J.Gehrke, "Database Management Systems", McGraw Hill, 2003. (Text book)
2. A. L. Tharp, "File Organization and Processing", John Wiley & Sons, 1988.
3. B. Salzberg, "File Structures: An Analytic Approach", Prentice Hall, 1988.

Grading

- Midterm 25 %
- Assignments 15 %
- Final 60 %

Policies

- Assignments must be submitted until the deadline to me.
- Late assignments up to 2 days may be accepted, but they are penalized.
- All assignments are to be your own work. No group assignments are allowed.

Course Outline

- Introduction to storage devices and data storage (Chapter 9)
- Tree indexes (Chapter 10)
- Hash indexes (Chapter 11)
- Secondary key retrieval (from A.Tharp book)
- External Sorting (Chapter 13)
- Introduction to database concepts (Chapter 1)
- Entity Relationship Model (Chapter 2)
- Relational Model (Chapter 3)
