

Homework # 3 (Due December 26th, 2019 until time 23:59)

Rules for submission:

1. You must submit your homework by sending e-mail to dataorg2017@gmail.com from your own e-mail account. All answers must be in one file (your e-mail must have a single attachment) .
2. You must write your student id number, name and surname in your e-mail.
3. Multiple e-mails for the same student will not be considered.

Question 1. Draw an ER diagram that captures the below problem description. Your answer should be a word document, or pdf file. If you draw it by hand it **must be readable, you should scan or take photo of your diagram and paste it to a word document.** Then, you can convert it to a pdf file and send it to the e-mail address dataorg2017@gmail.com

A Graduation Project Management database contains information about Supervisors, Students, and Projects.

Supervisors are the faculty members and they are identified by SSN, and have a name, an address, a title, and a department.

Students are identified by student_id_number, have a name, year, department, and gpa attributes. Students are members of project teams. Each project team has team id as the key, team name, and semester attributes. Some of the students are team leaders and each team leader manages exactly one project team, and each project team must have exactly one leader.

Projects have id (as key), title, description and supervisor attributes. Each project must have exactly one supervisor who is a faculty member. A supervisor can manage any number of projects.

Projects are assigned to project teams. A project team is assigned to exactly one project, but any number of project teams can be assigned to the same project.

Project teams submit a project report to the supervisor about their assigned project. And project reports should have id (key), title, full document, and date of submission attributes.

Question 2. Write the database schema for your ER diagram and write the SQL commands that are necessary to create the tables for your database schema.
